NOBLE INNOVATION DAY

Join NOBLE, JPEO-CBRND Sensors, and our government and industry partners as we deliver an integrated Command-and-Control/CBRNE demonstration that shows how the strategic and effective integration of CBRNE sensors onto uncrewed systems can enhance the DoD's capabilities while keeping the Warfighter safe.

NOBLE Innovation Day Features:

- Demonstration of CBRNE strategies that are fully integrated with Command-and-Control in real time using state-of-the-art C5ISR capabilities
- Collaboration with leading technology innovators to showcase groundbreaking solutions
- Hands-on experience for Government and Military personnel
- Solutions that empower our defense forces to protect our citizens and vital assets

Scan the QR code to register for NOBLE Innovation Day as a vendor partner. Participate in demonstration of CBRNE and C5ISR technology to Government and Defense attendees. Network with NOBLE and other manufacturers at our Vendor Social.
